

Professional Licensure or Certification Disclosure

Dialysis Technologist Training Program

This disclosure is being made in compliance with federal regulation 34 CFR §668.43

Midwestern Career College's Dialysis Technologist Training Program is approved by the Board of Nephrology Examiners, Nursing & Technology (BONENT).

For program listing visit <https://bonent.org/approved-training-programs/>.

- ✓ Midwestern Career College (MCC) has determined that the curriculum of Dialysis Technologist Training Program meets the state educational requirements for licensure or certification for Certified Hemodialysis Technologist/Technician (CHT) in Illinois, Indiana, Wisconsin. The CHT certification should be obtained within 18 months from being employed as a dialysis technician.
- ✓ MCC was unable to determine if completion of Dialysis Technologist Training Program meets the state educational requirements for licensure or certification for Certified Hemodialysis Technologist/Technician (CHT) in other 47 states and the U.S. territories.

In addition, Passing the Phlebotomy course offered within the program provides eligibility to sit for the Registered Phlebotomy Technician (RPT) exam through American Medical Technologists (AMT) or Phlebotomy Certification through National Center for Competency Testing (NCCT). RPT Exam requires completion of min. 50 venipunctures draws and 10 skin punctures.

To learn more about Registered Phlebotomy Technician (RPT) exam through American Medical Technologists (AMT) visit <https://www.americanmedtech.org/Phlebotomy-Technician>.

To learn more about NCCT Certifications visit <https://ncctinc.com/certifications>

- ✓ Midwestern Career College (MCC) has determined that the curriculum of Dialysis Technologist Training Program meets the state educational requirements for licensure or certification for Certified Phlebotomy Technicians in Illinois, Indiana, Wisconsin.
- ✓ MCC was unable to determine if completion of Dialysis Technologist Training Program meets the state educational requirements for licensure or certification for Certified Phlebotomy Technician in other 47 states and the U.S. territories.

Although there is no licensing requirement for phlebotomy technicians, employers prefer to hire experienced workers or certified applicants who have passed a national examination, indicating that the candidates meet certain standards of competence.

For more information please contact T. Ellis-Childs MS., ADN., RMA, Dean of Certificate Programs; 312-236-9000 ext. 1081; tellis@mccollege.edu.

Please be aware that there may be additional professional licensure or certification requirements like professional examinations, continuing education, background checks, years of work experience, fingerprinting requirements, etc. which are not covered by academic program's curriculum. Additional requirements may differ by state. Current and prospective students are strongly encouraged to contact the appropriate licensing or credentialing agency for their location or the state at which they desire to be licensed or certified to seek information and additional guidance.

Midwestern Career College strives to ensure that the information provided on this page is accurate and up to date. However, as professional licensure and certification requirements are subject to change at any time, students are strongly encouraged to regularly check with the certification boards and other credentialing agencies to confirm professional licensure and certification requirements for their program of study.
